Vol. 22

Chinook, Alberta. Thursday, Mar. 18th 1943

GIVE TO RELIEVE SUFFERING

Prisoners of war, bomb victims, men in hospital, members of Canada's armed forces overseas and at home—all testify to the immense and needy service performed by the RED CROSS. This great humanitarian work, MORE THAN EVER must go on. As the war extends and intensifies, the need grows greater.

Give GENEROUSLY to the

RED CROSS

Space donated by the
BREWING INDUSTRY OF ALBERTA

Helping to House Canada's War Workers

WHEN the huge shell-filling plant came to his town, Charles Hunter got to thinking about the critical shortage of housing . . . and about the two large cottages he owned. It wouldn't cost much to modernize and sub-divide them to make comfortable homes for four families.

He talked it over with his bank manager, who extended him a \$600 loan. With the money, Hunter not only converted his cottages but took part of the loan, along with some of his rental income, to remodel another house to accommodate eight single individuals.

With the aid of the bank Hunter helped to provide urgently needed homes for war workers. He has now paid off all but \$100 of the loan. A very small amount paid out for interest has thus enabled him to more than double his former revenues.

Such modest, highly useful loans typify the contributions that the banks make to Canadian enterprise. The above story is an actual case—only the name has been changed.

More than 5,000 experienced bank men out of 14,433 have gone into the armed forces since war began. This throws a greater burden on remaining staffs and new employees. Do your banking early in the day. Pay small bills by cash instead of cheque wherever possible. It all helps.

The CHARTERED BANKS of CANADA

FOR SALE

HOUSE FURNITURE for sale. Terms cash. Apply to Mrs. W. Gallagher, Chinook.

Mrs. Russell Marr who was in the Eler hospital for a week, returned to her home last Saturday.

Mrs. W. Milligan having spent a week with friends and relatives in Calgary, returned Sunday.

Mr. Doug Smith of Cereza was a Chinook visitor on Wednesday.

Mr. and Mrs. Ken Gulekson are Calgary visitors this week.

Don't forget to attend the Bazaar and Concert on Friday evening which had to be postponed last week owing to the bad storm. Program in the School Hall. Novelties and Games.

Contributions go to milk for Britain Fund. Admission 10 cts.

Ladies Card Club Met

The Ladies Card Club met at the home of Mrs. E. H. . . . were joined by Mrs. Targett . . . the club will meet next at the home of Mrs. . . .

A party was sponsored by the citizens of the town in honor of C. A. Mac, Butts of Jareholm, who is home on a few day's leave. A good crowd (considering the weather) attended, and pleasant evening was spent.

Dr. K. W. Neath
Director, Agricultural Department
North-West Live Elevator Association

Cereal Variety Recommendations. No less than eight varieties of wheat are officially recommended in the prairie provinces. Due to the striking differences in soil and climate found in various regions, it is natural that some varieties should be particularly well adapted to certain regions. Each year standard and new varieties are tested at widely separated points. Hundreds of such tests are conducted, and the results carefully examined by provincial cereal variety selection committees.

On the basis of experimental results, official recommendations are published, and these are distributed to all grain buyers of the elevator companies associated with the Agricultural Department of the North-West Live Elevator Association. Recommendations respecting oats, barley and flax are also included. In order to achieve the best results in grain production, the farmer must be sure to grow the variety best suited to his local conditions, and he must have reasonably pure seed which will germinate and grow vigorously.

Crop Improvement Associations are now functioning in each of the three prairie provinces and through them the country elevator grain buyer becomes the recognized distributor of registered and certified cereal seeds. He will be glad to advise respecting recommended varieties, and will place seed orders with the Crop Improvement Association.

Several new varieties of oats and barley have been released during the past few years. The emphasis now placed on livestock products justifies more attention to securing the best varieties of coarse grains. Also, the Government is asking for more and more flax.

Sow only good seed of a good variety.

Chinook Anglican Church

Service will be held on Sunday, March 21st, at 10:30 a.m. in the School. The service will be followed by a business meeting.

Minister, Rev. Mr. Christmas

Mr. and Mrs. E. C. Pfeiffer returned home Sunday, having spent the past week in Calgary.

Mrs. W. J. Thompkins left Friday for Calgary to see her son, Dean who met with a very bad accident to his foot while cutting ice.

Mrs. Jas. Aitken visited with relatives in Kindersley last week.

Co-operative Live Stock Shipping

Shipments will be made every two weeks or as often as necessary.

Ship your Stock Co-operatively and get all the market value.

WARNING

CANADA FACES A WOOD-FUEL FAMINE NEXT WINTER

ARE YOU one of the Canadian householders who burned fences, doors, and even flooring to keep warm in this winter's sub-zero weather? Or perhaps you are one of the lucky ones who just managed to scrape through?

In either case, you will want to be prepared for next winter when greater hardships loom: unless you take immediate action.

The shortage already has affected many communities . . . total stocks of dry wood are nearly exhausted . . . in some places the small supply of green wood cut for next winter is being used now to meet the present emergency.

Throughout most of Canada, fuel-wood is obtained not far from where it is consumed. Its production and distribution are the business of local citizens.

The Dominion Government recognizes that the wood-fuel shortage is so serious that even with the full co-operation of everyone in affected communities an adequate supply is not assured. Accordingly, it has been decided to stimulate the output of wood-fuel by assisting those normally engaged in its production and distribution. To this end, the following measures will be adopted:

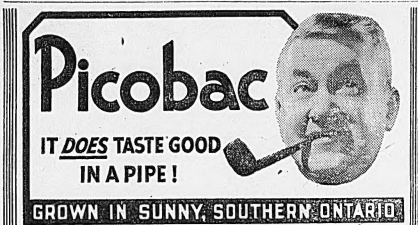

- 1 A subsidy of \$1.00 per cord will be paid to dealers on all commercial fuel-wood contracted for and cut on or before June 30, 1943, and held to dealers' account on that date.
- 2 The Coal Controller has been authorized to arrange in his discretion for the payment of such portion of the transportation costs as he considers proper in respect of fuel-wood, particularly in cases where dealers, to procure supplies, find it necessary to contract for fuel-wood at locations outside the area from which they normally derive their supplies. In order to obtain any such reimbursement, dealers must obtain a permit from the Coal Controller before contracting for such supplies.
- 3 The Coal Controller will repurchase from dealers at dealer's cost all commercial grades of fuel-wood on which a subsidy of \$1 per cord has been paid and which are still in dealers' hands as at May 31, 1944.
- 4 Assistance will be given in providing priorities for necessary equipment.
- 5 Farmers now on the farm, and who leave the farm temporarily in response to this appeal to engage in fuel-wood cutting, will be deemed by National Selective Service to be carrying out their regular occupation as farmers and will be given all the rights of deferment of military service which such an occupation now carries. Such temporary absence should not, however, interfere with agricultural production.

Municipal councils, farmers, fuel dealers, individual citizens, service clubs, and all other groups in communities where wood-fuel is burned, are urged to begin at once a rapid survey of their local situation, and to take immediate action to relieve the shortage.

IT DOES TASTE GOOD
IN A PIPE!

GROWN IN SUNNY, SOUTHERN ONTARIO

Island Of Malta

ALTHOUGH THE WAR is not ended, and without doubt much history will yet be written, there have already transpired many epic events, which will never be forgotten. In the Russian campaign there are the sieges of Sebastopol, Moscow and Stalingrad, and many other heroic actions which will live on in the history of Russia and in all the records of this war. In the United States the names of Pearl Harbor, Guadalcanal and Bataan stand out as symbols of events of historic significance. Dieppe will never be forgotten by the people of Canada, and in Britain there is Dunkirk, the first of many names to assume a deep and lasting meaning in connection with this war. The heroic defense of the Mediterranean fortress of Malta will undoubtedly have a place in this list of remembered events, for this island has had an important and exciting part in the Battle of the Mediterranean and in the campaign in North Africa.

Malta As An Air Base

R.A.F. planes based there, had destroyed 1,138 enemy aircraft. Until France fell, Malta was important only as a naval base, but it then became a target for fierce Italian air attack, and its value as an air base was established. At the time the enemy air attack started, there were only three obsolete British 'planes on the island. Today, Malta is known as "the unsinkable aircraft carrier," and her impregnable defense is a source of great irritation to the Axis. Many Canadians have fought at Malta, including Flying Officer George Beurling, D.S.O., D.F.C., D.F.M. and Bar, whose record for the destruction of 29 Axis 'planes over Malta has made him Canada's leading air hero in this war. Flying Officer Beurling has been in Western Canada recently in the course of a tour of the Dominion.

Located Near African Coast

Malta is an island in the Mediterranean, situated 58 miles south of Sicily and 180 miles north of Africa. It has an area of 95 square miles and has several fine harbors, the largest one being at Valetta. In the past, Malta has been known to the world because of its importance as a naval base, but it has a well-developed agricultural industry, vegetables, cotton and tropical fruits being produced. There is also some manufacturing, and in normal times it is an important commercial center for merchant ships, with fine facilities for re-loading and storage. The history of the island dates to 1000 B.C., when it was settled by Phoenician traders. After that it changed hands many times, but in 1814 it became a British dependency, administered by a resident governor. With the other Mediterranean strongholds of Gibraltar, Cyprus and Alexandria, Malta has played an important part in making possible the sea and air victories in that area and in the campaign in North Africa. There is no doubt but that the name of Malta will stand out among those made illustrious by valiant action in this war.

Recipe Of The Week

Baked Fish with All-Bran Stuffing is definitely a recipe with a future. It makes its appearance just in time to provide a delicious meat-alternate for meatless fast days. This recipe is great frequently during the Lenten season. Crisp shredded All-Bran adds a sweet as a nut flavor to the savory bread dressing which when baked in a tender fish is sure to bring applause for the cook. The recipe goes like this:

BAKED FISH WITH ALL-BRAN ONION STUFFING
1 (3 to 4 pound) fish 2 tablespoons melted butter
2 teaspoons salt or salad oil
1 recipe All-Bran Fish Stuffing Paprika

Have fish cleaned and prepared for stuffing. Wash thoroughly and wipe with cloth. Rub cavity with salt. Stuff and sew edges top and bottom with heavy thread. Place on greased oven-proof pan or baking pan and brush with melted butter or salad oil. Sprinkle paprika lightly over top. Bake in hot oven (450 to 475 degrees F.) 30 to 40 minutes, until well browned. Garnish with quartered lemon. Yield: Six servings.

ALL-BRAN STUFFING
1 cup fat 1 1/2 tablespoons lemon juice
1 1/2 cups stale bread crumbs 1 1/2 tablespoons chopped parsley
1/2 cup All-Bran 1/2 teaspoon salt
1/2 cup All-Bran 1/2 teaspoon pepper

Heat fat, add onions, bread crumbs and All-Bran; stir over low heat until crumbs are lightly browned. Add lemon juice, parsley, salt and pepper. Yield: Sufficient stuffing for 3 to 4 pound fish.

Note: 1 to 2 tablespoons water may be added if moist dressing is desired.

Baked Fish with stuffing, to which crisp shredded All-Bran adds a sweet as a nut flavor makes meatless days easy to take and win applause for the cook.

Desert Victory

Pictures Taken During British 8th Army's March To Tunisia

The story of the British 8th Army's march from Egypt right across to Tunisia retold in "Thousands of British cinemas." While the march was going on cameramen of the Army Film Unit kept right up with the forward troops and tanks to get the best pictures; in fact, they were so keen that at one time they actually got ahead and reached Tobruk an hour before the 8th Army did. An R.A.F. film unit was on the job, too. The film is called "Desert Victory."

SWINE DISEASES

Anemia Kills More Baby Pigs Than Die From All Other Diseases

This is the last of a series of six articles by J. L. Miller, V.S., provincial veterinarian, Regina, dealing with the more prevalent hog diseases. Previously published: Piglet Diseases; Septicemia and Baby Pig Diseases; Mumps and Bluetongue; Enteritis; Brucella; Worms.

In some districts more baby pigs die from anemia than all other diseases put together. Iron is necessary for the building up of the blood. Sow's milk is low in iron content, consequently young pigs frequently suffer from lack of blood, or anemia. Pigs which recover from this disease are weak for some time after and are thereby rendered much more susceptible to other diseases.

Symptoms: Sucking pigs which are closely confined and not allowed access to soil will do well until they are from two to six weeks old, then they lose their normal healthy color, becoming pale. This is particularly noticeable about the ears which are a chalky white in appearance. Moderate exercise causes them to become breathless, otherwise they may look quite normal and appear fat and chubby. If treatment is not taken at this stage pigs will gradually lose weight and die.

Treatment: Treatment should be started early to be effective. A solution containing the following ingredients should be given. Iron ammonium citrate—1 ounce, sugar—3 lb. water—to make one pint. Give each pig in litter half a teaspoonful daily for a few days, then follow the method suggested below. An eye-dropper can be used for dosing baby pigs.

Prevention: Starting when pigs are one week old, a pinch of reduced iron, half as much as can be held on an old five cent piece, should be placed well back in the mouth of each pig every week or ten days. This will usually cause the pigs through to wean, without any further treatment. As soon as pigs are weaned, feeding solid foods the danger of anemia is past.

HOG LICE

Lice are blood sucking insect parasites which are a continual source of irritation to infested animals. Lice are responsible for quite heavy losses through lack of gains in heavily infested herds of swine.

In obtaining their food, lice puncture the skin of the host animal and suck the blood. A new puncture is made in the skin each time a louse feeds, therefore the irritation caused by these parasites is almost continuous. In an attempt to relieve the intense itching, infested animals scratch themselves and rub against any convenient object. Frequent rubbing destroys the hair and often causes wounds in the skin. Hogs infested with large numbers of lice suffer from a lowering of the vitality and general unthriftiness.

The presence of lice is easily detected as this is the largest louse commonly found infesting animals. The adult female is almost a quarter of an inch in length, the male is slightly smaller. They are of a grayish color and are readily seen. The entire life cycle is spent on the host. The females deposit their eggs on the bristles close to the skin. Eggs hatch in from twelve to twenty days, and young lice reach maturity and lay eggs in about twelve days. Lice, when separated from the animal, live only two or three days. They pass readily from one animal to another when hogs come in close contact.

Practically all cases of infection occur from contact with lousy animals and not from infected premises. As a precautionary measure, however, it is always well to cleanse and disinfect any premises which have been occupied by lousy hogs. The cool tar creosote dips, diluted according to instructions on the container, are suitable for this purpose.

Treatment: The two most effective remedies for controlling lice are Crude Petroleum used in dipping vats, or kerosene oil emulsion applied by hand. Used crank case oil is a good substitute for crude petroleum and can be thinned down by the addition of distillate or kerosene, one gallon to ten of the oil, which increases its effectiveness.

Kerosene oil emulsion is usually applied by hand, and is not suitable for use in dipping vats. It is prepared as follows: Slice and dissolve half a lb. of soap in a gallon of water, heating the water until the soap is dissolved; add two gallons of kerosene, agitating the mixture until no free kerosene is observed on the top of the liquid, add the solution to ten gallons of soft water and apply by hand.

Treatment for lice should be repeated in fifteen days if found necessary.

GOTTIE AND HAIRLESSNESS

Baby pigs in districts where the soil is lacking in iodine, frequently born dead or die shortly after birth. On close examination, the bodies of these pigs are found to be totally or partly hairless. They are born in this condition due to a lack of iodine in the diet of the mother.

Prevention: Provide all brood sows with an adequate supply of iodine. One ounce of potassium iodide mixed with 200 lbs. of common salt is considered to be adequate for this purpose and should be fed for at least three months during pregnancy. Another dependable method is to prepare a solution of one ounce of potassium iodide in one gallon of water and place a tablespoonful of this solution in the food daily during pregnancy.

A Stockholm report broadcast by Radio London said Gestapo Chief Heinrich Himmler has forbidden German policemen to name their horses "Adolf".

Brave Under Fire

Two Women Of Auxiliary Air Force Carry On During A London Air Raid

When two WAFFS (Women's Auxiliary Air Force), one 22 and the other 18, were operating a balloon for the height of a balloon during a recent night raid on London, two bombs fell almost together to land about 25 yards on each side of them.

But they carried out the operation which sent the balloon to the proper height. This devotion to duty and disregard of danger was brought to the attention of all ranks in a special order by the Air Officer Commanding Balloon Command, Air Marshal Sir Leslie Gossage.

GEMS OF THOUGHT

CHEERFULNESS

What sunshine is to flowers, smiles are to humanity. They are but trifles, to be sure; but, scattered along life's pathway, the good they do is incalculable.—Addison.

The highest wisdom is continued cheerfulness; such a state, like the region above the moon, is always clear and serene.—Montaigne.

The mind that is cheerful at present will have no solicitude for the future, and will meet the bitter occurrences of life with a smile.—Horace.

Happy are the people whose God is All-in-All, who ask only to be judged according to their works, who live to love.—Mary Baker Eddy.

Cheerfulness is a friend to grace; it puts the heart in tune to praise God, and so honors religion by proclaiming to the world that we serve a good master.—Be serious, yet cheerful.—Thomas Watson.

Always look out for the sunlight the Lord sends into your days.—Hope Campbell.

The lowest spot on the earth's surface is the Dead Sea, 1,290 feet below sea level.

First jury composed entirely of women sat at Patuxent, Md., in 1656.

Victory Gardens

Canadians Are Urged To Grow Vegetables This Year

An appeal for all-out cultivation of victory gardens was issued by Canada's agricultural supplies board.

During 1943 amateur gardeners will be encouraged to forego competition as to who can produce the best rock garden, petunias or roses. The emphasis is definitely on tomatoes, carrots, cabbages, onions, beans and other vegetables.

A large proportion of Canada's farm output will be needed for the armed forces of the United Nations and the people of the United Kingdom. The board said there was sufficient vegetable seed to meet all requirements.

"Modernistic" setback skyscrapers are thousands of years old in design, the ancient southwest Indians having used the idea in their communal houses.

Chinook Woman Marks 85th Year.

Mrs. Harmon F. Berry of Chinook celebrated her 85th birthday on Saturday, March 13th, and her husband will be 85 on May 4th.

Mr. Berry, with two of their children, came from Kansas to Canada in 1909 and Mrs. Berry followed with the other children, in 1910; and they took up residence on their homestead 17 miles southwest of Chinook. The nearest railroad point at that time was Bassano.

They farmed until 1930, when they moved to town.

Last Christmas they marked their 62nd wedding anniversary. Both are in fairly good health. Mrs. Berry has knitted 12 pair of socks for the Red Cross since Christmas.

A few friends gathered in the afternoon and had tea with Mrs. Berry. Mrs. P. Peterson presented her with a beautifully iced birthday cake and a lovely home-made rug.
